

Cyberbot Managed Security Operations Center (SOC) Overview

Real-Time Threat Detection. AI Precision. Human Expertise.

Cyberbot's Managed SOC delivers 24/7 monitoring, detection, and response powered by AI-driven analytics and certified security experts. Our team identifies and stops attacks before they become breaches — providing complete visibility, faster response, and peace of mind for your business.

Key Features

- 24/7 Threat Monitoring: Continuous analysis of logs, endpoints, and cloud events.
- AI-Driven Detection: Machine-learning models identify anomalies and new attack patterns.
- Incident Response: Tiered escalation to L3 analysts within minutes.
- Threat Intelligence: Real-time integration with global threat feeds and dark-web monitoring.
- Compliance Reporting: Meets ISO 27001, SOC 2, and GDPR requirements.
- Custom Dashboards: Transparent visibility into alerts, tickets, and performance metrics.

Technology Stack

- SIEM: Microsoft Sentinel / Splunk / QRadar integration
- EDR: Defender for Endpoint / CrowdStrike / SentinelOne
- Automation: SOAR playbooks, threat enrichment, auto-containment
- Cloud Coverage: Azure, AWS, GCP

Performance Outcomes

| Metric | Before | After Cyberbot SOC |
|-----------------------------|---------|--------------------|
| Mean Time to Detect (MTTD) | 24+ hrs | < 2 hrs |
| Mean Time to Respond (MTTR) | 12 hrs | < 1 hr |
| Compliance Readiness | Manual | Automated |
| False Positives | High | Reduced by 60% |

Why Cybervbot

- Proven experience in AI security automation.
- North-American SOC team with 24/7 coverage.
- Flexible, scalable pricing for SMB and enterprise.
- Transparent communication with monthly reports.
